Subject: Lab selected for Bridgeton Dust investigation

Tetra Tech selected ALS laboratory for the analytical services based on their lower detection limit capabilities and lower minimum bulk dust requirements.

Just wanted to let you know.

Also, the lab provides the sampling containers for the bulk dust samples so that they can record an accurate weight prior to sampling.

Those containers will arrive on site Wednesday. That means we will have to return to any house that we may be able to investigate on Tuesday to collect the bulk dust samples.

Tom
